Re: Contractor Approval

To Whom It May Concern

Cymar have been visited by our technical support team on many sites and find them to be competent and professional in their approach to passive fire protection in all its aspects. Projects using our materials have had certified either under BCAR or confirmation of compliance statements.

They possess a sound understanding of the requirements of Part B of the building regulations and can submit a professional and feasible work plan for each of their projects

They have received training on our behalf in using AIM and Fireus fire production products and have more than 10 years' experience in the application of PFP including the Rockwool PFP products that we stock

I trust you find these comments of some relevance however if you should need any further information or clarification please do not hesitate to contact me.

Best regards

Michael Neill
